DETAILED ACTION

Claims 1-25 are pending in this application. Claims 1 and 14 are independent claims.

The present title of the invention is "Color management with tiered caching scheme". This action is non-final.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to generating an identifier key based on color measurement profile, classified in class 345, subclass 600.
 - II. Claims 14-25, drawn to arranging identifier keys into an identifier sequence, classified in class 345, subclass 603.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as generating an identifier key based on color measurement profile. Invention II has separate utility such as arranging identifier keys into an identifier sequence for device transform and gamut mapping. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
